

# WEATHER CHARTS

CHART NAME	SURFACE ANALYSIS	WEATHER DEPICTION	RADAR SUMMARY	CONSTANT PRESSURE ANALYSIS	COMPOSITE MOISTURE STABILITY	WINDS AND TEMPS ALOFT	LLVL SIG WX PROG	HLVL SIG WX PROG	CONVECTIVE OUTLOOK
OBSERVED OR FORECAST	OBSERVED	OBSERVED	OBSERVED	OBSERVED	OBSERVED	FORECAST	FORECAST	FORECAST	FORECAST
ISSUED	EVERY 3 HRS	EVERY 3 HRS FROM 0100Z	EVERY HOUR FROM 0035Z	EVERY 12 HRS	EVERY 12 HRS	EVERY 12 HRS	EVERY 6 HRS	EVERY 6 HRS	SEE "NOTES"
PURPOSE (USE)	Primarily to locate SFC fronts & pressure systems	Primarily to locate SFC IFR conditions	Identify areas of precipitation & TSTMS. Check intensity coverage and movement	Locate upper level pressure systems, winds, and fronts. Can check moisture and TURBC possibility.	4 panel chart used to locate areas of possible TSTM activity. To check for TSTM severity potential.	Wind direction & wind speed at planned flight level gives idea of avg enroute WCP. Temp. useful for effect on TAS & fuel flow.	Locate IFR areas, precip. Areas, turbc area, fronts, pressure systems, inversions, and FRZLVLS. SFC-400mb ~ (24000')	Locate: Jets, CBs, CAT, TROP LVLS, Hurricanes, SVR Squall LNS, Sand/Duststorms, fronts. ~FL250 - ~FL600	Areas which may expect general TSTMS and areas which may expect SVR TSTMS. Includes: SVRTS RISK notations. (LEVELS)
DEPICTS	<p><b>FRONTS - TIC]</b></p> <p><b>PRESSURE -</b></p>	<p>-IFR (Shaded)</p> <p>-MVFR (Contoured with shading)</p> <p>-VFR (Everything else)</p> <p>-[Know definitions!]</p> <p>-Fronts/Trofs</p>	<p>PRECIPITATION INTENSITIES:</p> <p>KNOW: LGT - MDT STG - V.S. int. - XTRM</p> <p>BLD ≥ 80% COV.</p>	<p>CONTOURS:</p> <p>WINDS PARALLEL and increase when?</p> <p>ISOTACHS:</p> <p>WHAT IS ALSO REQUIRED TO DETERMINE HOW?</p> <p>ISOTHERM</p>	<p>ISOPLETHS:</p> <p>Lines of an equal value. In this case</p> <p>○ LI &gt; 0</p> <p>● LI &lt; 0</p> <p>PLOTS:</p> <p>-10 → LI → BAD</p> <p>45 → KI → DAY</p> <p>10 → GOOD DAY</p> <p>-2 → DAY</p>	<p>30k</p> <p>°C</p> <p>-50 or 50 °</p> <p>3</p> <p>0 = DIRECTION</p> <p>1</p> <p>2</p> <p>3</p>	<p>12-hr SFC - 400mb</p> <p>24-hr SFC - 400mb</p> <p>12-hr SFC</p> <p>24-hr SFC</p> <p>Upper panels have a Legend:</p> <p>○ IFR</p> <p>☁ MVFR</p> <p>☁ TBC</p> <p>⋯ FRZLVL(s)</p>	<p>FL35</p> <p>80k</p> <p>360</p> <p>300</p> <p>SVR SQUALL</p> <p>ISOL (&lt; 1/8)</p> <p>OCNL (1/8-4/8)</p> <p>FRQ (5/8-8/8)</p>	<p>(To the right of line is general TSTM activity forecasted.)</p> <p>SEVERE TSTM areas are:</p> <p>with a RISK notation in the circle or near.</p>
